## Garbage Pick - Up

**Garbage** .....Wednesday and Saturday Mornings

**Yard Waste\*** ..... Wednesday Morning

**Recycling**..... Wednesday Morning

**\* Yard waste**

consists of living debris (Trees, Grass, Shrubs, etc.)

Do not include any other type of wood, dirt, rocks or garbage or any type.

Yard trash such as trees, limbs, and branches must be cut to less than 4ft lengths with each piece weighting less than 50 lbs. It should be stacked up in the same direction.

Loose yard trash, such as leaves, grass, pine needles, mulch, etc. must be in a container. The best container to use is a regular 30-32 gallon garbage can weighing less than 50 lbs. when filled. Do not use oil drums or large containers without handles.

**Special Note:**

Disposal of Hypodermic needles in the garbage or recycling is now forbidden by law. "Sharps Containers" must be used. When needles are found, garbage and recycling pickup is stopped completely, the customer is sent a letter and a brochure published by the County the same day the call comes in from the driver. A copy of the letter is also sent to the County/City so that they are aware of the stop in service. Service will not resume until the company is contacted and advised that the customer has purchased the "Sharps Container" for disposal.
